Summary of Course
This course is a core requirement for qualified practicing teachers who wish to gain a formal qualification in the area of special education and who already have the approved subject knowledge background in the field. This course comprises 30 days of advanced professional practice, including high-level teaching, observation and critical reflection in the area of special education, together with peer observations and school-based fieldwork. It provides a teaching method at a more advanced level of complexity and depth than that is offered in pre-service courses, ensuring all graduates of the program meet the Institute of Teachers’ standards for professional competence. This professional practice course is usually undertaken in conjunction with the completion of the co-requisite courses EDST5106 Behaviour Management of Exceptional Students, EDST5107 Teaching Methods for High Incidence Disabilities, EDST 5113 Autism Spectrum Disorders: Educational Practices, and EDST5111 Intellectual Disabilities.
Aims of the Course
The overall aims of the course are to provide appropriate supervised advanced professional practice in a key specialist teaching area defined by the Institute of Teachers, and its interstate equivalents, as part of a systematic programme of upgrading and/or re-skilling of practicing teachers.

4. RATIONALE FOR THE INCLUSION OF CONTENT AND TEACHING APPROACH

Field-based work is a critical component of effective teacher education, not only providing an essential forum for generating concrete problems and issues and applying new knowledge and skills, but also enabling the development of an integral link between theory and practice. The equivalent 30 days of teaching practice is also a mandated component of any specialist teaching method for schools and adult educational institutions nationally.

5. TEACHING STRATEGIES

Students learn best when they are engaged and given an appropriate level of challenge; when their prior experience and knowledge is valued and built upon; when they are expected to take responsibility for their own learning; and when they work collaboratively with their peers. Thus, teaching strategies used during the course will include:

- Small group cooperative learning to address teaching and learning goals;
- Structured occasions for reflection on learning to allow students to reflect critically on and improve teaching practice;
- Extensive opportunities for whole group and small group dialogue and discussion, allowing students the opportunity to demonstrate their capacity to communicate and liaise with the diverse members of an education community, and to demonstrate their knowledge and understanding of method content.
- Online learning from readings and web links on the Moodle website and associated web-based resources.

These activities will occur in a classroom climate that is supportive and inclusive of all learners.

6. COURSE CONTENT AND STRUCTURE

NOTE: This course is a blended face to face and field-based course so reliable and easy access to the internet is essential. Students must be teaching in their area of specialisation.

There will be an introductory workshop, followed by three further two-hour meetings with a workshop leader and a group of students enrolled in the same specialisation. The workshop leader is also responsible for all assessment and teaching practice visits of students in that specialisation.

**Assessment Details**

**Assessment 1**
A written IEP and Behaviour Plan for one student, to be completed by Friday 28 August (templates provided if necessary).

**Assessment 2:**
Successful classroom performance and the ability to operate independently both within the classroom and within the wider school community as judged by UNSW staff, demonstrated by satisfactory completion of:

(a) lesson plan logbooks, including a record of 3 observations and all classes taught,
(b) self-evaluations at the end of each lesson (provided in the form of a short paragraph of how the lesson went and what can be done to improve it if necessary)
(c) at least one peer-evaluation (a form will be provided),
(d) a reflective problem-solving diary. Students are expected to define one challenge they are facing in their classroom. This challenge could be academic, behavioural or institutional. They will study the identified issue in the professional literature (5 resources minimum) and prepare an action plan. They will evaluate the success of their intervention in their reflective problem-solving diaries.

The assignment must be completed by the reflective meeting.
