**SUMMARY OF COURSE**

In this course, you will explore the underlying philosophy and rationale for assessment for learning, and the key approaches and problems in the implementation of such classroom-based assessment, including the implications for the role of the teacher-as-assessor, the nature of effective feedback, how to involve students in self and peer assessment, and the conflicts between such assessment systems and those emphasizing large scale testing for student selection and/or school accountability. This course focuses on developing your confidence and expertise in using assessment to effectively support student learning.

**THE MAIN WAYS IN WHICH THE COURSE HAS CHANGED SINCE LAST TIME AS A RESULT OF STUDENT FEEDBACK:**

- New resources are added to update the current understanding of assessment for learning. Also, there are resources added for higher education context to address the needs of academics who are enrolled in this course.

4. RATIONALE FOR THE INCLUSION OF CONTENT AND TEACHING APPROACH

Assessment for learning (AfL) occurs when assessment is conceptualized and implemented as an integral component of learning and teaching. It involves teachers designing and implementing their own classroom-based assessment tasks, actively engaging learners in self and peer assessment and incorporating critical but constructive feedback into the assessment cycle. Black & Wiliam (1998) and Hattie (2008) have convincingly demonstrating the learning gains that can be achieved through well-focused teacher-based formative assessment, demonstrating no other strategy has such potential for enhancing student learning across age levels and in different contexts. However, there are a number of issues and complexities within the classroom practice of AfL which challenge teachers and students, hence the importance of this course.

5. TEACHING STRATEGIES

We learn best when we are engaged and given an appropriate level of challenge; when our prior experience and knowledge is valued and built upon; when we are expected to take responsibility for our own learning; and when we work collaboratively with our peers. Thus, teaching strategies used during the course will include:

- Small online group cooperative learning to demonstrate the use of group structures to address learning and teaching goals;
- Structured occasions for reflection on learning to allow you to reflect critically on and improve teaching practice;
- Demonstrate your knowledge and understanding of method content.
- Other online learning tasks through short test, self-assessment, video, forums, readings and web links on the Moodle.

All these activities will occur in an online environment that is supportive and inclusive of all learners.

<tr>
<td><strong>Week 1</strong></td>
<td>Understanding assessment for learning: Its underlying philosophy and key principles</td>
</tr>
<tr>
<td>3 June</td>
<td>This session introduces you to the underlying rationale and key assumptions of assessment for learning, the differences between assessment for learning and assessment of learning, the core concepts of norm-referenced, criterion-referenced and standards-referenced assessment and formative/summative assessment, current approaches to AfL locally and internationally and the key conditions for implementing AfL, at the same time creating positive washback for teaching and learning. You will be shown a series of excerpts and/or case studies of AfL practices and interviews with teachers, parents, students and administrators in schools to exemplify the key points and to provide a stimulus for discussion and more systematic input.</td>
</tr>
<tr>
<td><strong>Week 2</strong></td>
<td>Teacher as a student partner: Developing and sharing learning outcomes, success criteria and performance standards (rubrics)</td>
</tr>
<tr>
<td>10 June</td>
<td>This session focuses on developing learning outcomes, success criteria and performance standards. You will develop your skills on how to develop clear and explicit learning outcomes, identify success criteria and write performance descriptions that are aligned to the learning outcomes. You will critic various strategies used for ensuring that students understand what evidence is required for each performance described and how students can effectively use rubrics to improve their learning and enhance achievement. The session will conclude by identifying various ways on how to effectively communicate to students the learning outcomes and rubrics.</td>

Teacher as an assessor: Designing and implementing appropriate and trustworthy assessment strategies and tasks

This session focuses on planning for the integration of assessment for learning into learning and teaching at every stage of the teaching cycle (lesson, unit, course), developing and adapting sample assessment tasks for their own classes, and developing and/or using standards-based criteria to assess students' development. You will first analyse the characteristics of an effective assessment task by looking several video excerpts of real tasks, then after discussion and further input, complete two activities in which they have to first critique and adapt an existing task, then develop an assessment task and appropriate criteria for their own context.

In addition, this session focuses on the key principles of effective assessment - validity, reliability, practicality, authenticity, as well as concrete concerns such as the issue of juggling sometimes conflicting roles (teacher vs assessor) and how to ensure students do their best whilst at the same time being enabled to make trustworthy assessment judgments. The difference between norm-referenced, criterion-referenced and standards-referenced assessment will also be clarified, and various forms of verification explored, including social moderation and benchmarking.

Week 4  
24 June

**Teacher as a pedagogy expert: Using assessment and assessment data to plan learning and teaching activities**

This session focuses on the role of the teacher to use a wide range of assessment information to inform teaching and learning activities. You will identify sources of information which are needed to effectively plan a lesson. The session will conclude by outlining ethical standards in assessment.

**Key readings:**

Differentiated assessment. Education Alberta. Retrieved from [http://education.alberta.ca/media/1233985/7_ch4%20differentiated.pdf](http://education.alberta.ca/media/1233985/7_ch4%20differentiated.pdf)

Week 5  
1 July

**Teacher as a motivator: Using assessment to develop self-regulated and highly motivated learners**

This session focuses on using assessment strategies to enhance student motivation. You will analyse various ways to develop a classroom environment that values individual students. Also, you will identify ways to use assessment information to adapt teacher teaching to meet individual learning characteristics.

**Key readings:**

---

Week 6  
8 July

**Teacher as a data literate professional: Interpreting educational data**

This session highlights the data literacy needs of teachers. It covers test design, analysis and interpretation using the Item response Theory. The focus of this session is the use of summative assessment for formative purposes. You will analyse assessment data and use the results to inform both learning and teaching.

**Key reading:**

---

Week 7  
15 July

**Teacher as a student partner: Engaging students in self and peer assessment**

This session focuses on the critical importance of helping students learn how to assess their own development, and that of their peers, and practical strategies for involving students in self and peer assessment. You will analyse the features of effective student participation in self and peer assessment by discussing several
video excerpts of learners undertaking real assessments, then after discussion and further input, complete two activities in which they have to first critique and adapt, then develop an assessment task and appropriate student-oriented criteria for their own context.

Key reading:

---

**Week 8**
22 July

**Teacher as a student partner: Providing high quality feedback/feed forward and reporting student learning**

This session focuses on various strategies and techniques for providing appropriate and timely feedback to learners on their development, communicating to other key stakeholders, evaluating the assessment process and outcomes, building an AfL culture in the school, and maintaining effective records of every students’ assessment participation and achievement, including samples of student work. You will analyse the characteristics of effective feedback by looking at several video excerpts of teachers giving whole class and individual feedback.

Key readings:

---

**Week 9**
29 July

**Teacher as a teacher learner: Building a community of teacher learners**

This session focuses on how to build a community of teacher learners. You will identify various ways to use assessment information to identify the effectiveness and appropriateness of your classroom practices. Also, you will engage in self-assessment using the teacher AfL competency framework and will identify your professional development needs both in AfL literacy and in curriculum-content knowledge.

Key readings:

Teacher as a stakeholders partner: Enhancing community's trust and establishing a home-school collaboration

This session focuses on how to establish a continuing dialogue with stakeholders particularly with the parents and the community as a whole. You will identify various strategies to address each stakeholder's information need to enhance community trust. More importantly, you will develop various strategies to establish a home-school collaboration to support student learning.

*First submission is optional but highly encouraged. The purpose of this submission is to receive teacher feedback and peer feedback. Students will then revise their output based from the feedback and submit their final paper.

**Submission of assessments**

Students are required to follow their lecturer's instructions when submitting their work for assessment. All assessment will be submitted online via Moodle by 5pm. Students are also required to keep all drafts, original data and other evidence of the authenticity of the work for at least one year after examination. If an assessment is mislaid the student is responsible for providing a further copy. Please see the Student Policies and Procedures for information regarding submission, extensions, special consideration, late penalties and hurdle requirements etc. [https://education.arts.unsw.edu.au/students/courses/course-outlines/](https://education.arts.unsw.edu.au/students/courses/course-outlines/)

Some or all of the following questions can be used to focus your thinking and/or structure your reflections:  
  * How has assessment changed in your learning and teaching context in recent years?  
  * In what ways have your own understandings of, and practices related to, assessment changed and/or need to change?  
  * What factors have caused these changes?  
  * What are the implications of these changes for the relationship between assessment, learning and teaching?  
  * What are the more urgent challenges and issues for you/your colleagues in relation to assessment?  |

| Task 2 Development of an AfL-infused curriculum unit | 4500 words (60%) | This task requires you to take an existing teaching unit from your context and to infuse it with the principles and practices of assessment for learning as discussed throughout the course and related readings. The unit should include:  
  - A statement of rationale, purpose, and focus  
  - Details of student learning activities  
  - Details of assessment activities  
  - Details of resources to be used  
  - Reflection and Concluding statement of 1800 words explaining how the unit embodies AfL principles and demonstrates your understanding of key concepts and issues (cite a range of literature) explicitly raised during the course and in your follow up readings.  
  
Alternatively, if you have an innovative assessment practice (original) and you have used it in your class, you can write a paper (3,500 words) to describe it. You need to provide a strong theoretical rationale and discuss its practical applications in improving student learning. You need to provide an empirical evidence to support your claim.  

Other alternative assignments may be negotiated.  

*You are required to conduct a self-assessment of your first draft using the rubrics for this task. Submit the results of your self-assessment with your paper through email.* |
