SUMMARY OF COURSE

This course examines curriculum differentiation for gifted and talented students across a variety of educational contexts. The course focuses on assessment strategies to identify individual needs and enhance differentiated curricula for gifted learners. Current research, resources and policies on appropriate curriculum design, teaching models and effective strategies will be explored, including how to teach to strengths and interests, developing metacognition and self-regulation. A variety of research-based curricula models will be investigated, including Maker’s and Williams’, with varying taxonomies and matrices. Examples will be provided that combine differentiating meaningful content, flexible learning processes and complexity in products for effective learning outcomes across a variety of supportive learning environments. The course includes planning to enable differentiated curriculum and assessment in your educational context, in order to inhibit underachievement and support talent development.

THE MAIN WAYS IN WHICH THE COURSE HAS CHANGED SINCE LAST TIME AS A RESULT OF STUDENT FEEDBACK:

- Will continue to revise readings, resources, and content. Will develop the website more for online delivery as the course moves from a face-to-face intensive to an online course.

4. **RATIONALE FOR THE INCLUSION OF CONTENT AND TEACHING APPROACH**

The content of the course provides an overview of the major research and issues that may be relevant to the development of appropriate differentiated curriculum and assessment for gifted and talented students. This course builds upon the prior knowledge gained in the introductory course EDST5808. The teaching approach will actively engage students as they discuss current theory and practice, and learn new information, strategies and skills.

5. **TEACHING STRATEGIES**

A variety of individualised and grouping arrangements are designed to present key information on a range of content, concepts and issues in the development of appropriate curriculum for gifted and talented students. Online small group discussions and practical activities on assessment for individual student needs and curriculum design based on interests and strengths will assist participants to become more thoroughly familiar with differentiated curriculum content, processes, products and practices which are shown to be effective with gifted and talented students. Specifically, the course will include:

- Small group cooperative learning to understand the importance of teamwork in an educational context and to demonstrate the use of group structures as appropriate to address teaching and learning goals;
- Explicit teaching including recorded lectures & workshops with a variety of teaching strategies to engage and support learning;
- Opportunities for whole group and small group dialogue, discussion, allowing students the opportunity to share their expertise and demonstrate their capacity to communicate;
- Structured occasions for reflection on learning to allow students to reflect critically on issues discussed.

These activities will occur in a climate that is supportive and inclusive of all learners.

### Submission of assessments

Students are required to follow their lecturer’s instructions when submitting their work for assessment. All assessment will be submitted online via Moodle by 5pm. Students are also required to keep all drafts, original data and other evidence of the authenticity of the work for at least one year after examination. If an assessment is mislaid the student is responsible for providing a further copy. Please see the Student Policies and Procedures for information regarding submission, extensions, special consideration, late penalties and hurdle requirements etc. [https://education.arts.unsw.edu.au/students/courses/course-outlines/](https://education.arts.unsw.edu.au/students/courses/course-outlines/)

### Assessment Details

**Assessment 1:**

A response to required readings. Students will evaluate readings and discuss application and use to their own teaching practices.

**Assessment 2:**

A short answer quiz will be completed on Moodle based on required readings up to Week 6.

**Assessment 3:**

A case study student will be used to design differentiated curriculum that applies the models and scaffolds in the course.

SPECIFIC CRITERIA

Understanding of the question or issue and the key concepts involved

- Responded well to all component parts of the question or issue
- Identified important issues/concepts/ideas relevant to your case study
- Provided relevant assessment techniques to identify student strengths, interests & learning needs
- Planned differentiated teaching strategies & learning activities that matched the case study needs in your educational context
- Matched gifted student learning needs to relevant grouping techniques
- Showed how to provide opportunities for enriching, extending, scaffolding or self-regulating learning
- Identified support needed for talent development
- Used the models accurately to plan for differentiated teaching and learning

Depth of analysis and/or critique in response to the task

- Analysed/evaluated chosen techniques/strategies/theories/models from this course
- Demonstrated higher order thinking skills (e.g., analysis, synthesis, evaluation)
- Showed deep thinking e.g. identified relationships between key issues/concepts
- Evidence of originality/creativity in applying chosen techniques/strategies/theories/models was provided

Familiarity with and relevance of professional and/or research literature used to support response

- Used appropriate reading content and sources
- Referenced course text/readings/wider reading
- Read more widely beyond the course recommendations
- Showed familiarity with different perspectives, issues, or concepts identified in the literature

Structure and organisation of response

- Provided a succinct introduction, logical sequencing, and flow of content, concluding a paragraph drawing together key outcomes of the report
- Used appropriate technology e.g. Inspiration or other graphic software, PowerPoint/Prezi. Multi-media, Word, Data Bases, Spelling/Grammar Check, Internet searches, Endnote for referencing, Moodle to access readings and resources

Presentation of response according to appropriate academic and linguistic conventions

- Wrote clearly with appropriate sentence structure, paragraphing, proof reading, vocabulary, spelling, punctuation, word length, readability
- Used serious, formal and academic style of writing
- Used APA conventions in academic writing, such as quoting, paraphrasing, in-text referencing, citations, and reference list.
- Provided clear tables, figures, graphics where applicable
