3. COURSE DETAILS

Course Name	Extension Mathematics Method 1
Credit Points	6 units of credit (uoc)
Workload	Includes 150 hours including class contact hours, readings, class preparation, assessment, follow up activities, etc.
Schedule	
Lecture	Thu 4 pm (w1-4,5-10,N4, JGoods 119)
Tutorials	Thu 5-7pm (w1-4,5-10,N4, JGoods 119)

Summary of Course

This course is designed as an extension Mathematics method course focusing on a deep understanding of pedagogical content knowledge for Mathematics teaching. Students will critically examine syllabuses. Students will appraise a range of strategies for teaching and assessing Mathematics and consider elements needed for quality teaching specific to Mathematics. Students enrolling in this course must also complete EDST6725 – Mathematics Method 1 (6uoc).

Aims of the Course

This course aims to:

- Increase a student's pedagogical content knowledge for Mathematics teaching.
- Develop a student's understanding of what comprises effective classroom practice.

The main ways in which the course has changed since last time as a result of student feedback:

- Provide opportunities for students to demonstrate their skills in tutorials as often as possible.
- Students will practise a variety of strategies to test their own abilities to engage and motivate others in the class.

Important information

- **Assessment:** Please note that all students must pass **all** assignments to pass the course, and they must pass the course to go on placement for PE 1.
- **Attendance:** Students are expected to give priority to university study commitments. Unless specific and formal permission has been granted, attendance at less than 80% of classes in a course may result in failure.

Student Learning Outcomes

Outcome		Assessment/s
1	Demonstrate knowledge and understanding of the Australian curriculum in NSW for stages 4, 5 and 6	1, 2, 3, 4
3	Demonstrate the essential link between outcomes, assessment, teaching strategies and lesson planning.	1, 2, 3, 4
7	Discuss classroom strategies that recognise students' different approaches to learning.	1, 2, 3, 4
8	Analyse specific assessment strategies for a diverse range of students	1, 2, 3, 4
9	Develop appropriate and engaging resources for the Mathematics classroom that take into account students' skills, interests and prior achievements and that respect the social, ethnic and religious backgrounds of students.	1, 2, 3, 4

Program Learning Outcomes (AITSL Professional Graduate Teaching Standards)

Standard		Assessment/s
1.2	Demonstrate knowledge and understanding of research into how students learn and the implications for teaching.	1, 2, 3, 4
1.3	Demonstrate knowledge of teaching strategies that are responsive to the learning strengths and needs of students from diverse linguistics, cultural, religious and socioeconomic backgrounds.	1, 2, 3, 4
2.1	Demonstrate knowledge and understanding of the concepts, substance and structure of the content and teaching strategies of the teaching area.	1, 2, 3, 4
2.4	Demonstrate broad knowledge of, understanding of and respect for Aboriginal and Torres Strait Islander histories, cultures and languages	4
2.5	Know and understand literacy and numeracy teaching strategies and their application in teaching areas	1, 2, 3, 4
2.6	Implement teaching strategies for using ICT to expand curriculum learning opportunities for students	2
3.3	Include a range of teaching strategies.	1, 2, 3, 4
3.4	Demonstrate knowledge of a range of resources including ICT that engage students in their learning.	1, 2, 3

National Priority Area Elaborations

Priority area		Assessment/s
Aboriginal and Torres Strait Islander Education	A1-9, Week 8	2, 4
Classroom Management	B 1- 5 Week 5	2, 3
Information and Communication Technologies	C 1-6 Week 4	2, 4
Literacy and Numeracy	D 1 -1 9 Across all Weeks and Assignments	1, 2, 3, 4
Students with Special Educational Needs	E 1 – 4 Week 2, 6	
Teaching Students from Non-English Speaking Backgrounds	F 3 – 4 Week 2	2,3,4

4. RATIONALE FOR THE INCLUSION OF CONTENT AND TEACHING APPROACH

This subject aims to develop best practice in teaching based on current research. During the course students will expand their knowledge of The Australian Curriculum for New South Wales documents. Lectures, tutorials and assignments will cover a variety of approaches to teaching and learning in the Mathematics classroom. Emphasis will be given to the relationship between Mathematics, literacy and numeracy, the proficiencies, the general capabilities, and the role and value of Mathematics in the curriculum and the community.

Student-centred activities will form the basis of the course. These activities will draw on the prior knowledge of the students and will allow them to engage in relevant and challenging experiences that mirror those they will be expected to design for the secondary students they will later teach.

5. TEACHING STRATEGIES

- Explicit teaching, including lectures, to demonstrate an understanding of students' different approaches to learning and the use of a range of teaching strategies to foster interest and support learning.
- Small group cooperative learning to understand the importance of teamwork in an educational context and to demonstrate the use of group structures as appropriate to address teaching and learning goals.
- Extensive opportunities for whole group and small group dialogue and discussion, allowing students the opportunity to demonstrate their capacity to communicate and liaise with the diverse members of an education community, and to demonstrate their knowledge and understanding of method content.
- Structured occasions for reflection on learning to allow students to reflect critically on and improve teaching practice.
- Online learning from readings on the Moodle website.
- Online discussions.
- Peer teaching in a simulated classroom setting.

These activities will occur in a classroom climate that is supportive and inclusive of all learners.

6. COURSE CONTENT AND STRUCTURE

Week	Weekly Topic
1 (29 Feb – 4 March)	Working Mathematically / Proficiencies Writing Assessments (preparing for Assignment 1)/ Rubrics/ Marking Criteria Questioning Techniques Literacy
2 (7-11 March)	Positive Mathematical Dispositions Workshop & Presentation Priority Areas Students with special educational Needs E1-4 Assignment 1 to be submitted on Moodle 9 March by 5 pm

<p>3 (14-18 March)</p>	<p>Lesson starters and Rich Tasks.</p> <p>Analysing Lessons Observing Lessons and reflecting on classroom practice. What is best practice?</p> <p><i>Student Presentations</i></p>
<p>4 (21-25 March)</p>	<p>Teaching with Technology</p> <p>Priority Areas ICT C1-6</p> <p><i>Student Presentations</i></p>
	<p>Mid-Semester Break</p>
<p>5 (4 April-8 April)</p>	<p>Managing the mathematics classroom Dealing with challenging behaviours Student Engagement</p> <p><i>Class Quiz</i></p> <p>Priority Areas Classroom Management B1-5</p> <p><i>Student Presentations</i></p>
<p>6 (11-15 April)</p>	<p>High Performing Students</p> <p>Priority Areas Students with special educational Needs E1-4</p> <p><i>Student Presentations</i></p>
<p>7 (18-22 April)</p>	<p><i>ICT skills/preparation for Assessment 2</i> <i>Class Quiz</i></p> <p><i>Student Presentations</i></p>
<p>8 (25 April-30 April)</p>	<p>Mathematics General Course</p> <p>Meeting the needs of Aboriginal and Torres Strait Islander Education</p> <p>Priority Areas Indigenous A1-9 Teaching Students from NESB F3, 4</p> <p><i>Student Presentations</i></p>

9 (2-6 May)	Mathematics General Course; Focus Studies Planning lessons & units of work <i>Class Quiz</i> <i>Student Presentations</i>
10 (9-13 May)	Preliminary & HSC Mathematics Course Teaching for Understanding Advice for Professional Experience from teachers and previous students Assessment 2 is due via Moodle 11 May 5 pm <i>Student Presentations</i>
Professional Experience	
11 (20-24 June)	Feedback and Reflection on PE1: Highs and lows; areas you improved the most; areas you still need to work on; useful strategies; inspiring use of ICT and other contemporary teaching resources.

7. ASSESSMENT

Assessment Task	Length	Weight	Learning Outcomes Assessed	Graduate Attributes Assessed	National Priority Area Elaborations	Due Date
1. Writing Assessment tasks	2500 words or equivalent	30%	1, 3, 7, 8	1.2, 1.3, 2.1, 3.3, 3.4	A1-9, B1-5, D1-19	Week 2 9 March 5:00 PM
2. Technology	2500 words or equivalent	40%	1, 8, 9	1.2, 1.3, 2.6, 3.3 3.4	A1-9, B1-5, C1-6, D1-19	Week 10 11 May 5:00 PM
3. Class Quizzes	Based on readings and lectures	30%	1, 3, 7, 8, 9	1.2, 1.3, 2.1, 2.5, 3.3	A1-9, C1-6, D1-19	Week 5,7,9

Students are required to follow their lecturer's instructions when submitting their work for assessment. All assessment will be submitted online via Moodle by 5pm. Students no longer need to use a cover sheet. Students are also required to keep all drafts, original data and other evidence of the authenticity of the work for at least one year after the assessment due date. If an assessment is mislaid the student is responsible for providing a further copy. Please see the Student Policies and Procedures for information regarding submission, extensions, special consideration, late penalties and hurdle requirements etc.

Assessment Details

1. Creating an Assessment Task for a topic in Mathematics (30%)

Construct a 20-minute rich assessment task for a topic/s from the Stage 4 NSW Mathematics syllabus using your ICT skills to present it.

- The assessment should be a written task (e.g. it can be an end of unit test or an assessable project).
- Identify all Australian Curriculum for NSW *outcomes* in the task and show how they are linked to the questions in the assessment.
- You will need a written reflection to explain why you think it is a good assessment and how you would modify this task to meet the needs of your students (differentiation). You must avoid giving your own opinion without any backing from research literature on assessments in Mathematics.
- Explain how the proficiencies are being used in the task. (Reasoning, Problem Solving, Fluency, Understanding)
- Explain and justify whether your task is Assessment for learning, Assessment of learning or Assessment as learning.
- Include and justify your marking criteria for this task.
- Include a rubric for the task.
- Word counts for such assessments may vary greatly. If you are unsure about this aspect, please email me for further clarification.

2. The use of technology in teaching mathematical concepts (40%)

Explain how you would use a computer-based mathematical tool (e.g. Geogebra, Autograph, MExcel, Wolfram Alpha, Geometer's Sketchpad etc.) to help students learn a particular mathematical concept.

- Identify a mathematical concept that you wish to teach using technology as an aide.
- Identify all The Australian Curriculum for NSW outcomes in the task and show how they are linked to the activity.
- Include an instruction worksheet for students to use for this activity using your ICT skills.
- Include a lesson plan (see proforma in handbook). Include enabling prompts and extending questions in your lesson plan.
- You will need a written annotation to explain how the technology nominated in your task assists the students in better understanding the chosen concept. You must also identify how you would modify this task to meet the needs of your students (differentiation) as well as how you would carry out assessment for learning (AfL) in the process. Once again, avoid giving your own opinion without any backing from research literature.
- Demonstrate your concept electronically e.g. using "show me" app so that a student who has missed the lesson could understand the new concept by being sent the file (see flipped classrooms). Be prepared to share this with your class.

FEEDBACK SHEET - EDST6726 EXTENSION MATHEMATICS METHOD 1

Student Name:
Assessment Task 1

Student No.:

Specific criteria	(-) ————— (+)				
Understanding of the question or issue and the key concepts involved <ul style="list-style-type: none"> Understanding of the task and its relationship to relevant areas of theory, research and practice. Rationale linked to outcomes in the syllabus. Show evidence of critical analysis and reflection. 					
Depth of analysis and/or critique in response to the task <ul style="list-style-type: none"> Ability to plan and assess for effective learning by designing an assessment task, marking criteria and rubric using knowledge of the NSW syllabus documents or other curriculum requirements of the education act. Reasons for the choice of questions and why it is a good task effectively explained Demonstration of knowledge, respect and understanding of the social, ethnic, cultural and religious backgrounds of students and how these factors may affect learning. Demonstrates knowledge of resources that will engage and extend all students. Clear statement of syllabus outcomes Assessment/Task goal(s) clearly linked to syllabus outcomes and chosen strategies Correct use of Mathematical terminology Syllabus related terminology clearly explained and justified appropriately 					
Familiarity with and relevance of professional and/or research literature used to support response <ul style="list-style-type: none"> Reference specifically to material, research and ideas presented in method lectures, readings from the prescribed text and other sources, relevant lectures from the combined method lecture series and from the professional experience lectures on diversity. 					
Structure and organisation of response					
Presentation of response according to appropriate academic and linguistic conventions					
General comments/recommendations for next time					

Lecturer
Recommended: /20 (FL PS CR DN HD)

Date
Weighting: 30%

NB: The ticks in the various boxes are designed to provide feedback to students; they are not given equal weight in determining the recommended grade. Depending on the nature of the assessment task, lecturers may also contextualize and/or amend these specific criteria. **The recommended grade is tentative only, subject to standardisation processes and approval by the School of Education Learning and Teaching Committee.**
